Features

■ Embedded Control Panel

User friendly embedded control panels are located on both safety sides of head section. Using the control keyboards on internal and external parts of safety sides, the patient and caregiver are able to adjust the back rest, knee rest, and height of the bed, ensuring optimal comfort and convenience.

■ Nurse Control Panel (Optional)

Easy to use Attendant Control Panel (ACP) with illustrative schematics located at the foot end of the bed provides all required positions. As the ACP has IP66 rating, it is resistant against dust and water.

■ Central Locking Casters

150 mm central locking casters run extremely smoothly; the quality that makes it significantly easy for the nursing staff to move the bed. In addition, the foot pedals allow effortless transition between the three modes of the central locking system to provide a smooth and controlled single person transportation of the bed in medical centers.

- safe central locking (down)
- easy maneuvering and positioning (middle)
- fast directional movement (up)

■ Bed Ends

The seamless blow-molded bed ends are lightweight, durable, and easy to clean. The bed ends are of high quality and compatible with steam cleaning. To have better access to the patient's head in emergency cases, the caregiver can easily remove the bed ends by grasping the hand holds and lifting them up in one single step. Moreover, the bed ends have integrated steel fittings which make them extremely strong so the nursing staff can move the bed by holding and pushing them without worries.

■ Mattress Platforms

The mattress platforms exhibit exceptional qualities, including smooth surfaces, high durability, and effortless removal for easy cleaning and disinfection. Additionally, the mattress platforms are designed to be compatible with steam cleaning, ensuring thorough and effective sanitation.

■ Actuators

This bed effortlessly transitions into various positions, thanks to its robust, dependable, and low-noise actuators. With an IP66 rating, the actuators are safeguarded against dust and water, making cleaning and disinfection a hassle-free task in medical centers. This notable feature ensures the bed can be regularly maintained to meet stringent hygiene standards.

■ Neutralizing Springs

By incorporating springs into the mechanism, the applied pressure on actuators is effectively neutralized, resulting in improved performance and durability.

■ Safety Sides

35000E has retractable overlapping Safety sides, with embedded control keyboards for the patient and caregiver. Providing a protective height and length, the sides adhere to the highest standards of safety to prevent patient fall and entrapment.

■ Urine Bag Holder

Beds are equipped with a urine bag holder which can be easily installed on either side of the bed.

■ Bumpers

Innovative rotary bumpers which are located on four corners of beds can prevent to a large extent the damages that may cause collision of the bed to the surroundings during transportation.
