Patient Trolley 8000T1 Type 2

Piyatech 2023-8000T1 Type 2_V01.Validity.Dec.2024

MDA Establishment License No.: MDA-1216-K120
 MDA Product Reg. No.: GMD45614744918A

Features

Side Rails

8000T1 has a pair of durable, robust, and easy to clean side rails that provide a protective height and length to ensure the patient's safety during transportation and treatment period. Both safety side rails are equipped with innovative and easy to use locking mechanisms that allow the rails to be securely locked in an upright position to maximize the patient's safety. Pulling the upward locking handle, the caregiver can easily collapse the side rails.

Cranks

The backrest and Kneerest positions can be adjusted by two cranks that are located at the foot end of the trolley. The cranks can be tucked under the trolley to avoid any collision with the surroundings.

Hydraulic Cylinder

The lower section of the 8000T1 bed is equipped with a foot pedals on each side, operated by robust and high-quality hydraulic cylinder. This pedal allow for easy adjustment of the trolley height.

Adjustable Grip Handles

Two pairs of adjustable handles at the head and foot end of 8000T1 allow the nursing staff to move the trolley easily in the medical centers.

Mattress Platforms

The trolley's ABS mattress platforms boast many helpful features, like smooth surfaces, high durability, and a lightweight, easily transportable frame enabling quick and painless removal for cleaning and disinfection, including steam cleaning.

Oxygen Cylinder Holder

Oxygen cylinder holder is located underneath the trolley.

Urine Bag Holder

Urine bag holders can easily install on either side of the trolley in one step.

Casters

200 mm central locking casters run extremely smoothly, the quality that makes it significantly easy for the nursing staff to move the bed. In addition, the foot pedals allow effortless transition between the three modes of the central locking system:

- Safe central locking (down)
- Easy maneuvering and positioning (middle)
- Fast directional movement (up)

to provide a smooth and controlled single person transportation of the bed in the medical centers.
